TIME: 10:00am - 5:45pm

FRIDAY 23RD NOVEMBER 2018 // HARRUP PARK, MACKAY

REEF CATCHMENTS INVITES PRIMARY PRODUCERS AND INDUSTRY TO THE ANNUAL MACKAY HEALTHY SOILS SYMPOSIUM. THIS EVENT IS FREE TO ATTEND.

PRESENTERS

SOIL

Andre Leu - key speaker

John Attard - cane farmer
Building soil carbon through plant diversity and on-farm bio-fertilisers and soil ameliorants

Garry Spotswood - mixed farmer
Alternative management of organic integrated farming systems

Michael Rocca - mixed farmer
Bio-char; Black magic

CLIMATE

Neil Cliffe - DAF
Applying the climate risk matrix

Healthy soil is paramount to a productive, prosperous and healthy future in agriculture. Find out more about the tools many farmers are adopting to get the most from the ground up.

Learn how to build soil carbon, regenerate your landscape, and farming practices including bioferts, bio-char and other soil ameliorants.

KEY SPEAKER

ANDRE LEU

International Director of Regeneration International
Topic - regenerative agriculture and climate change

This event is followed by a separate harvest celebration in the Botanic Gardens for those interested - [a Watershed Land Art Project in the evening 6:00pm - 9:00pm](#). Entry is free for Soil Symposium attendees, please indicate when registering.
